About This Game

Lifeblood is based in a fantasy world where players must team up to compete in a forested battle arena. As a fatal shroud engulfs the land in dark energy, contestants must fight to the death in order to stop its spread. In a land ruled by the Gods, it is decided that only one team may remain. Ensure your survival by harvesting resources from natural nodes and crafting armor. Armor can be reinforced with additional resources to a maximum of three tiers. Take control of the relentless Berserker, the mystical spellslinger, and other many unique classes! Together they form a completely unbiased and fresh take on class-based PvP. Classes may be changed as the game progresses by equipping different weapons, each granting the classes' abilities to the wielder. Become a force to be reckoned with as the shroud pushes survivors to the final destination, a central tower untouched by the shroud's dark energy. Make your final stand here and be granted the favor of the Gods!

Lifeblood is not limited to Battle Royale as we will release other game modes with newfangled concepts for PvP on the horizon. What makes Lifeblood different from other class-based games is how there is no 'role' a player must fill, such as a tank or healer. Lifeblood is not centered around solo gameplay. We strive to create an environment where players must communicate and work together to be effective.

Lifeblood is developed by Homage Studios, an independent game developing company started in 2017.

Coming Soon:
New Classes: additional classes will be added, including Assassins, Rangers, and Crusaders
Shrines: points of contention on the map where players can exchange Etherium for special gear and items.
Parties: groups of five will be able to compete in the battle arena.
Ranked Play: players will be matched according to a ranking system and play under competitive rule.

Solo Queues: only one survivor may remain in this game mode.

Burokku Girls is the latest game from Silver Cow Studios, who previously developed Time Tenshi, another similar VN. This confuses me, since Time Tenshi's cliffhanger ending still hasn't been resolved with the sequel yet, but what can you do, right? If you haven't played Time Tenshi, the basic gist of these games is a focus on a deep "plot" and "well-developed" characters, by which I mean "great big gazongas". The actual storylines aren't bad, but at times they feel like more of a conveyor belt for floppy funbags, and it's safe to say that if you're not buying it for the sweater puppies you might want to look elsewhere. I didn't really like the story of Burokku Girls as much as I did Time Tenshi, but it was still decent outside of the occasional moment where it fell too deep into anime cliche. This game is notably darker than Time Tenshi, however, which might be off-putting for people just looking for a good wank. But the real question is, does it end on a cliffhanger like Time Tenshi? Well...

[To be continued in the Burokku Girls 2 steam review]. Not worth it. Nauseating / epilepsy inducing sky of noise and poor production value disguised "this is an art style". No end goal, nor any real objectives. No actual neural network in this game either. This game is arbitrary and not good.. i played it. I picked this up on sale on a whim and wasn't expecting to get much out of it, but I'm really enjoying the beautiful pixel art and the procedurally generated levels! It's about as weird as you'd expect from the previews and screen caps, and a lot more fun.. I really liked this game. Not sure what all the negative reviews where about.

I would say "it is what it is" because of the nudity and obvious reason why I and everyone else bought it. But on it's own merit, it's really a good game. Not the longest game, but plenty of entertainment. The battles where actually challenging towards the end, most of the characters where charming and likable, exploration was definitely rewarded.. Thumbs up.

I will say, the main character (the one you play as) is a♥♥♥♥♥♥ Perhaps a little more than a♥♥♥♥♥♥ But, considering hypergamy, he is exactly what he has to be for any of the girls liking him to make sense. I hate to say it, but if he was a nice guy, it would be immersion breaking. I died a little typing that. But it's the truth.

Another note. I was hoping that there would be possible harem ending. There might be, but I'm having a hard time finding out. The process of earning love and obedience points from the girls is grueling (like real life, lol). If you spend your MP charming them, you get p0wned in fights. If you use your MP to survive the fights, the girls hate your guts. Items to serve as social lubricant are scarce at best. The formula for wooing them requires a doctorate in mathematics. (Not really, and devs - please don't stop using advanced metrics like this, they're wicked cool!) Really, about the only way to get one naked or get anywhere with them is to pick one for each play through, give her all the items and attention, and cross your fingers.

Oh, and SAVE FREQUENTLY!! Like before entering EVERY room. You'll run over an event trigger or click on something and you'll be forced to make a choice that has no takesies backsies option. Also, *spoiler alert* don't waste precious resources on the girl with the biggest boobs in the beginning of the game. She dies. I about rage quit on her, lol.

All in all, I give this game 9\/10. Graded on a curve for it being a TnA game and subtracted one point for making it so damn hard to get muh soft core pr0n! ;). this is a fun game but short you guys need to add more stuff to this game. hey guys should give the game another chance, they updated the cards you get for nodes, on map arenas are better, packs for tourneys are better, and you get rejuv for killing boss in the tree now. in fact you will have better than i, when you beat it as i beat it before the update.. It's good if you already know Kanji.

Adding a game mode where you start with a few selection of Kanjis then it gradually adds more would be interesting because starting off with more than 10 on the screen might be overwhelming for people who are new to Kanji.

I wouldn't look much further if you are looking for large scale tactical combat.

Graphics are minimal but suit it perfectly.

Gameplay wise, not many games give you the feeling of an actual battle taking place, artillery firing, bodies littering the ground and thousands of sprites firing away at each other.

A must buy for all strategy lovers out there!. Fantastic little game. Easly one of the more creative and interesting rouge-lite/bullet-hell thingos out there. Plus the controls are a joy and the sense of mystery and discovery are ace. 10/10 would trip again. A fairly fun citybuilding\/space strategy game with a nifty plot.. This game is fairly short, but it is engaging and entertaining. Setting, plot, and artwork are all excellent.. Beautiful classic jugsaw puzzle with amazing pictures, easy interface and relaxing music. Seems like pictures are unique - kudos to devs.
Overall - best jigsaw puzzle on PC I ever seen,
10 turtle ships from 10,. It's an interesting mix of the Doodle series with side-view Tower Defence. As you combine elements, you unlock new elemtnal defenders, as well as buffs and spells and passive augments. Each win unlocks more guesses to allow you to continue (hopefully) upgrading your elementals. Overall, it seems fairly intuitive and gives hints, however, since you don't know the names ofall the spells ahead of time, you, like myself, may resort to simply trying every combination. That's where the game gets rather grindy. Also, though the game starts out easy, the difficulty scales very quickly. By level 10-12, even the easiest setting become a hard-fought battle to win (or maybe I just stink at the gameplay part). In short, if you can get the game for around $5-7, I'd say it's a good play, but I wouldn't pay full price for it because, once you start consistantly losing, there's nothing to do but grind lower levels and hope to get lucky in the lab. If you are very god at side-view tower defense, however, you may well do much better at this than I.. Alien Swarm meets Torchlight?
Greed: Black Border is an interesting game. not the hack 'n slash you would expect, but absolutely something to check out..
Please make an AI mode and bring it out for mobile players
